SUBJECT: Note from [redacted]

25X1C

Attached is [redacted] of 29 Mar 63 provided by [redacted] He allows that it is an old bit of information, but thinks there is still something worthwhile in it. He asked that I pass the report to the above addressees, and particularly in the case of OEL and ORD, Gene would be willing to follow through to obtain specifications on equipment for either the 1963 order or the expected order in 1967 discussed in Section marked "A."
